Common Disease and Illness..... [40](#)

INTRODUCTION

Chatham University is home to almost 2,300 undergraduate and graduate students. Chatham's Shadyside Campus includes the historic, 39-acre Woodland Road arboretum campus, the Eastside campus at Fifth and Penn Avenues, and the Eden Hall Farm Campus is located on 388-acres in Richland Township and houses the School of Sustainability. The University is a private, selective, fully accredited, nonsectarian institution consisting of four distinct Colleges:

School of Arts, Science and Business - offering baccalaureate and master's degrees

School of Health Sciences - offering baccalaureate degrees leading to health science careers

Falk School of Sustainability – offering baccalaureate and master's degrees in sustainability and food studies

College for Continuing and Professional Studies - offering undergraduate, graduate, professional and continuing education online

The University is accredited by the [Middle States Commission on Higher Education](#), 3624 Market Street, Philadelphia, PA 19104, (267) 284-5000; and the [Pennsylvania Department of Education](#).

The Master of Physician Assistant Studies Program (MPAS) at Chatham University provides academic and clinical training that will prepare its graduates to be certified and licensed to practice collaboratively with physicians and other healthcare providers, especially the primary care providers, in a competent, ethical, and reliable manner.

Vision & Mission Statements

Vision

To strive for excellence in physician assistant education whose graduates are known as outstanding clinicians in the community and leaders in the profession trained by faculty who are recognized for developing and researching innovative curricular methods.

Mission

The Chatham University MPAS Program is dedicated to producing knowledgeable, compassionate, ethical, and clinically skillful graduates who are ready to provide health care services to all persons without exclusion and who are willing to become the future leaders and educators of the profession. This will be accomplished by:

- Recruiting and retaining outstanding PA students from diverse backgrounds and educating them to practice as primary care providers to serve those in the communities they live and work;
- Providing a student-centered curriculum which promotes self-directed and lifelong learning through the use of evidence-based medicine;
- Promoting professionalism and service to the community;
- Contributing to the advancement of knowledge in medicine and physician assistant education;
- Encouraging students to serve local, national, and international communities through active involvement in service-oriented programs for medically underserved populations;
- Involving students in interprofessional activities and encouraging the development of team skills and an appreciation of team-based, patient-centered care;
- Promoting participation in professional organizations and the education of future PAs;
- Supporting sustainability through health promotion, disease prevention, health literacy, cultural competency, and reduction of printed materials in and out of the classroom.

PBL Model

Chatham University utilizes a hybrid model of Problem-Based Learning, lecture, and on-line activity that challenges students to be self-directed and prepares students for the evidence-based, problem-oriented world of clinical medicine. Through actual patient cases, students develop learning issues, research topics using the most up-to-date resources, work in teams and receive feedback on knowledge base as well as professionalism to prepare them for primary care, problem-focused clinical practice.

Program Competencies

The program has adopted the Competencies for the Physician Assistant Profession, created by our professional organizations, as the Program's Core Competencies or Goals. These competencies define the expected minimal and specific knowledge, skills, and attitudes required of physician assistants in order to practice.

1. Apply knowledge of basic sciences with a focus on clinical application across the lifespan.
2. Perform an appropriate history and physical examination to determine a differential diagnosis and plan of action.
3. Manage general medical and surgical conditions to include understanding the indications, contraindications, side effects, interactions, and adverse reactions of pharmacologic agents and other appropriate treatments.
4. Competently perform clinical procedures considered essential in primary and surgical care.
5. Students will develop the skills necessary to become lifelong learners and demonstrate commitment to stay current with medical knowledge through critical evaluation of medical literature.
6. Exercises cultural humility by recognizing the cultural norms, needs, influences, and socioeconomic, environmental, and other population-level determinants affecting the community and individual being served.
7. Demonstrates ability to effectively communicate across the continuum (verbally, non-verbally, and in writing), with patients, families, and the healthcare team.
8. Respect the dignity and privacy of patients across the lifespan including consideration for legal and ethical matters.
9. Demonstrates emotional resilience, adaptability, self-awareness, and understands the importance of wellness and self-care.
10. Identify risk factors, screening, and interventions for the prevention of diseases across the lifespan.
11. Understand the legal aspects of the healthcare system including the regulatory environment, funding and payment sources, PA scope of practice, and PA/physician relationship.

Certification

Eligibility for practice as a physician assistant requires passing the Physician Assistant National Certifying Exam (PANCE) given by the National Commission on Certification of Physician Assistants. All states require this certification for licensure.

Physician assistants must complete 100 hours of continuing medical education every two years and take the Physician Assistant National Recertifying Exam (PANRE) every ten years. Further information regarding continuing medical education can be found on the National Commission on Certification of Physician Assistants website under certification maintenance - <https://www.nccpa.net/MaintainCertification>

Accreditation

The PA Studies Program is accredited by the [Accreditation Review Commission on Education for the Physician Assistant](#) (ARC-PA). Only graduates of an accredited program are permitted to sit for the PANCE.

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted **Accreditation-Continued** status to the **Physician Assistant Program** sponsored by **Chatham University**. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with ARC-PA *Standards*.

Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the *Standards*. The approximate date for the next validation review of the

program by the ARC-PA will be in **March 2024**. The review date is contingent upon continued compliance with the Accreditation *Standards* and ARC-PA policy.

FACULTY AND STAFF

All faculty and staff other than the Medical Director have offices in Chatham's Eastside Building at 6585 Penn Avenue.

LEXICON

The following is a list of commonly used words, phrases, or abbreviations:

Academic Calendar – The Physician Assistant Program academic calendar specifies the dates for the various units of academic and clinical education. This includes vacation periods and does not necessarily coincide with the academic calendar for the college.

Academic Coordinator – The faculty member who is responsible for assuring that the curriculum meets the educational needs of the students as well as the requirements of the profession.

Advisor – Although students are ultimately responsible for their own academic progress, every student will be assigned a faculty advisor who appreciates their unique interests and goals, is knowledgeable about academic policies, and is able to refer them to appropriate resources. Advisors help students as they develop academically, professionally, and personally.

Assessment – The program will assess all aspects of each student's performance during the academic and clinical portions of the program. Each student's competence will be determined to either meet program standards (satisfactory) or not meet program standards (needs improvement). The program will require remediation of students whose performance is determined to need improvement. Persistent performance that needs improvement or failure to successfully remediate may result in failure of a course and potentially deceleration or dismissal from the program.

Attrition – A reduction in number

Student attrition: the permanent loss of a matriculated student from the course of study in a physician assistant program

Case Presentation – Students orally describe a patient's case in a logical, concise format.

Class Representatives – Each class of physician assistant students will elect a president, vice president, secretary, treasurer, and delegates who will act as representatives for the students in all program and College matters.

Course Competencies/Learning Outcomes – Course Competencies and learning outcomes are statements of the knowledge, skills, and abilities the individual student possesses and can demonstrate upon completion of a learning experience or sequence of learning experiences (e.g., course, unit, program, or degree).

Course Objectives/Learning Objectives – Learning objectives/course objectives have 3 parts: an observable, measurable behavior (for example, "select the correct response"), the conditions under which the behaviors should be performed (for example, "in a written exam"), and the extent to which students must master the behavior (for example, "with a 75% minimum score"). Learning objectives are tied to course outcomes that are tied to program competencies.

Curriculum Calendar– The physician assistant curriculum calendar specifies the course content of each unit and comprises all of the courses required to attain a Master of Physician Assistant Studies degree

Deceleration – A student’s failure to meet the minimum competencies required at selected points throughout the program and which can result in a delay in graduation

DxR – DxR Clinician is a web-based patient simulation tool that is used during the PBL cases in PAS 600 and PAS 601, Essentials of the Physician Assistant and within PAS 625-628, Clinical Decision Making I-III. This system allows students to question the patient, conduct a simulated exam and order/interpret diagnostic tests. During each portion of the patient interaction, students are able to review responses and results to simulate and actual patient encounter.

Formative Assessments – Formative assessments are done during the course of a semester, providing the opportunity for immediate evidence for student progress at a particular point in the program. These may include written and oral examinations, skills demonstrations, and patient case presentations, to name a few. These assessments help monitor the progress being made by students towards achieving learning outcomes.

Health Professional Shortage Areas (HPSAs)- are designated by HRSA as having shortages of primary medical care, dental or mental health providers and may be geographic (a county or service area), demographic (low income population) or institutional (comprehensive health center, federally qualified health center or other public facility). Medically Underserved Areas/Populations are areas or populations designated by HRSA as having: too few primary care providers, high infant mortality, high poverty and/or high elderly population

Health Resources Services Administration (HRSA)- HRSA is the primary Federal agency for improving access to health care services for people who are uninsured, isolated, or medically vulnerable.

Learning Issues – Topics that arise from a patient problem about which the student decides if they need further exploration for understanding

Learning Objectives/Course Objectives – see course objectives above

Learning Outcomes/Course Competencies – see course competencies above

MCQ Exams – The program will administer periodic multiple choice question exams to aid students in identifying new learning issues and to help the students to assess their fund of knowledge. This will also aid the student in evaluating their test taking skills and strategies in preparation for the PANCE.

Patient Management Assessments – These problem-based exams assess the students' clinical reasoning skills and fund of knowledge by working through actual clinical scenarios. Students receive feedback regarding their clinical reasoning skills.

Practical Exams – The program will administer periodic practical examinations to aid students in identifying new learning issues and to help the student to assess their skill acquisition. The student will demonstrate specific skills including physical examination and clinical procedures.

Problem-Based Learning (PBL) – A method of medical education by which students are presented with a simulated patient problem. Students develop and utilize self-directed learning skills to build their knowledge base as they work through these cases. Both problem-solving and clinical-reasoning skills are developed through this educational approach.

PBL Facilitator – A faculty member who guides a group of students through a patient problem

PBL Group – A group of students (usually 7 to 9) working together on a PBLM. Groups and facilitators change periodically during the curriculum.

PBL Module (PBLM) – A real patient case used during PBL sessions

PBL Unit– A portion of the curriculum organized around a series of PBLMs

Remediation – The program requires students to identify and incorporate elements that may be lacking in their performance and identify learning issues and resources necessary to achieve satisfactory performance in order to progress in the program.

Resources– Any source that can be utilized to resolve a learning issue. This includes books, computer searches, journal articles (considered a primary source), and people (faculty, PAs, MDs, or others knowledgeable in the area).

Screening Brief Intervention and Referral to Treatment (SBIRT)- An evidence based and patient centered method for approaching unhealthy alcohol/substance/tobacco use. Promotes concepts of universal screening, brief intervention using motivational interviewing techniques, and referral to appropriate levels of treatment when indicated. The focus is on early intervention.

Chatham's SBIRT Initiative-Funded by a 3 year SBIRT Health Professions Training grant from the Substance Abuse and Mental Health Services Administration (SAMHSA), Chatham has partnered with The University of Pittsburgh's School of Pharmacy, Program Evaluation Research Unit (PERU) and Allegheny Health Network (AHN). The training program is integrated into all School of Health Sciences programs. Education is provided regarding evidence based practices to address unhealthy substance use with patients in clinical settings.

Shadow Health is a web-based patient simulation tool that is used in PAS 637 and PAS 638, Physical Diagnosis I and II. Students are able to move through a patient problem individually and at their own pace with this program. The system allows the students to conduct a patient interview and a focused physical assessment and elicit subjective and objective information from the encounter. At the completion of the interview and assessment the students are required to document their findings, develop an appropriate treatment plan and provide patient education. They are then able to compare their document and treatment plan to the one that is provided by the shadow health system.

Special Seminars – Informational, topic-driven sessions and experiences meant to enhance student learning

Standardized Patient (SP) – A simulated patient presentation during which the student demonstrates their patient evaluation and management skills

Summative Assessments – Summative assessments are comprehensive in nature, provide accountability, and are used to determine if students have met the minimal competency level required at the end of each component of the program (didactic and clinical year). This is usually composed of a comprehensive MCQ exam, a practical exam, and a standardized patient practicum.

Clinical Rotation Specific Terms

Clinical Coordinator – A faculty or staff member who supervises the recruitment of clinical sites, the scheduling of students' clinical experiences and assignments, and conducts periodic clinical site visits.

Clinical Experience (CE) /Rotation – A four to five-week full-time experience at a clinical site during the clinical portion of the curriculum in the students' second year.

Clinical Site – An office, clinic, hospital, or other health care facility where a student learns to care for patients under the supervision of a preceptor

Competitive site – Sites deemed competitive by the clinical staff includes those which have more demanding schedules, patient loads or preceptor expectations than other sites. Students will be evaluated for placement at such sites by the faculty prior to CE scheduling.

Distant Site – A clinical site which is greater than a 300-mile radius from Chatham

Introduction to Clinical Experience (ICE) – During the didactic year, this course provides an introduction to medical documentation, HIPAA regulations and issues surrounding cultural sensitivity in medicine. Professional comportment while on rotations will also be introduced

Preceptor– Physician, physician assistant, nurse practitioner or other health care provider who supervises a physician assistant student during a clinical experience

CURRICULUM

Introduction to the Curriculum

The curriculum is a 24-month (85 semester credit) professional course of study leading to the Master of Physician Assistant Studies (MPAS) degree. Basic medical sciences, research, clinical methods, and clinical experiences are integrated from the beginning of the program and continued throughout the course of study.

The program produces physician assistants capable of providing primary medical care in an ethical, legal, safe, and caring manner. To achieve this, students must acquire knowledge and the ability to use that knowledge in the practice of medicine. Students are expected to consistently retrieve and apply their knowledge appropriately in the area of their patients and reason effectively. Self-directed learning skills are necessary in order to keep their knowledge current. Self-knowledge, knowledge and understanding of others and continued professional development beyond the degree are necessary for success. Problem-based learning is the basis for the entire curriculum. In this learning process, the student encounters a clinical problem which serves as stimulus for the application of clinical-reasoning, self-directed learning, and teamwork skills. They are encouraged to seek out all available resources, thus developing skills necessary for the life-long learning that a medical practitioner must use.

The MPAS program is competency-based, requiring all students to master the required material. The grading system is pass/fail. Any student receiving a failing grade may remediate the course work as further described in this manual with the approval of the respective instructor of record.

A student in the MPAS program must be in good academic standing to remain enrolled in the program. To be eligible for graduation, students must be in good academic standing and successfully complete all required courses.

Problem-based learning forms the backbone of the entire curriculum. In this learning process, the student encounters a clinical problem that serves as stimulus for the application of clinical-reasoning skills. Students then initiate a search for information and knowledge needed to understand the mechanisms responsible for the problem and how it might be resolved. Students acquire knowledge at the same time they develop their clinical-reasoning, self-directed learning, and teamwork skills. They are encouraged to seek out all available resources, thus developing skills necessary for the life-long learning that a medical practitioner must use.

In order for students to be awarded the degree of MPAS, they must complete the entire curriculum within three years of initiating coursework.

Course Sequence

PAS 630	Topics in Clinical Medicine	3
PAS 635	Healthcare Policy	1
PAS 636	Program to Practice	1
TOTAL CREDITS		85

*denotes partial online course **denotes online course

NOTE: 1 credit of lecture is equivalent to 14 hours of in-class instruction over the given term as outlined by the University policy in the course catalog. 1 credit of lab is equivalent to 21 hours of in-class instruction over the given term as defined by the MPAS program. These credit loads exclude anticipated time devoted to course study outside of class.

Class Schedule

The schedule below is to provide a template for a typical first year student's week. Students are assigned to PAS 600/601, PAS 602/603 and PAS 637/638 in groups at the beginning of each semester. **Students will not attend both a morning and afternoon session of PAS 600/601.** PAS 606/607 is held on varying Tuesday evenings and is a hybrid course with in class and online activities. Remaining courses are integrated throughout daytime hours within the week.

	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
8AM	PAS 600/601 Essentials for the PA	PAS 602/603 CABS Lab (Group B)	PAS 600/601 Essentials for the PA	PAS 602/603 CABS Lab (Group A)	PAS 600/601 Essentials for the PA
9AM					
10AM					
11AM

6PM					
7PM					
8PM					

Course Outcomes

Didactic Learning General Goals

1. The student will develop a strong knowledge base.
2. When encountering an unfamiliar problem, the student will be able to build, organize, and articulate the basic science knowledge and concepts that can explain the problem and which can then be employed to resolve the problem.
3. The student will develop clinical reasoning skills.
4. The student will demonstrate the ability to use the clinical reasoning process in the investigation and solution of medical problems.
5. The student will develop self-directed learning skills and self-assessment skills.
6. When a student encounters a problem that they are unable to explain, the student will be able to design and implement satisfactory learning strategies, monitor the adequacy of personal knowledge and skills, assess the effectiveness of the self-directed learning strategies used, and critically assess the learning resources for adequacy, quality, and credibility.
7. The student will develop competence in clinical skills.
8. The student will demonstrate appropriate interview and physical examination techniques.
9. The student will demonstrate appropriate clinical procedural skills.
10. The student will develop professional interpersonal skills.
11. The student will demonstrate effective interpersonal skills while interacting with patients, peers, faculty and others.
12. The student will demonstrate cultural sensitivity in all interactions.

Clinical Experience General Goals

1. The student will develop comprehensive patient care skills.
2. The student will apply the core medical knowledge acquired during the academic year while assessing, evaluating and managing patients. They will demonstrate that the care they provide is effective, patient-centered, timely, and equitable.
3. The student will develop self-directed practice reviews and research skills.
4. The student will engage in critical analysis of their own practice experience, medical literature and other information resources for the purpose of self-improvement. As a result, they will be able to assess, evaluate, and improve their patient care practices.
5. The student will develop a keen knowledge of healthcare policies and the business of medicine.
6. Student will demonstrate an awareness of and responsiveness to the health care system and engage in practices designed to improve the system of which their practices are a part.

Course Competencies and Course Objectives

Course competencies and course objectives are located on each individual syllabus.

Outcomes Assessment

Periodic assessments are conducted to assure that students are attaining the knowledge, skills and behavior required of a practicing physician assistant. These assessments are used to assist the faculty and students in identifying areas for further study and to give students feedback on what they have already learned. Assessments in this program may include the following:

Didactic Education Assessments

SOAP Notes

These papers will be evaluated for writing skills as well as content and format.

History and Physical Examination Practicum/OSCE

Students will demonstrate and document history and physical examinations in several courses.

Clinical Procedures Practicum

Students demonstrate knowledge of procedural skills.

MCQ Examinations

Students take multiple choice question examinations in multiple courses.

PMA (Patient Management Assessments)

Students take written question format examinations in Essentials for the Physician Assistant.

Remediation Assignments

Students complete remediations for missed items on MCQ examinations, demonstrating knowledge of the correct answer, and citing references.

Oral Presentations

Students provide patient presentations during PBL sessions, relative to the patient being evaluated.

Group Presentations

Students work together to provide a collaborative presentation in several courses.

Other Medical Documentation

Students complete other medical documentation such as: admission orders, operative notes, discharge summaries, etc.

PBL Skills and Participation Evaluation

Evaluations of critical thinking, clinical reasoning, self-directed learning, self-evaluation, and professional/team skills are done at the end of each unit. Students are directed to course syllabi for specific criteria.

Clinical Education Assessments

Preceptors' evaluations

These evaluations will be based on the observed student interactions with patients, oral presentations, history and physical examinations, progress notes, and any other professional interactions.

Clinical coordinator evaluations

These evaluations will be based on the observation of the student in the clinical setting and/or discussion with the clinical preceptor, oral presentation, written H&Ps, SOAP notes, procedure notes, operative notes, initial patient evaluations, discharge summaries, and review of the student's patient encounter logs.

Computerized patient and procedure tracking system

This system will track patient encounters and clinical procedures performed during the student clinical experience. The information entered will be evaluated by the clinical coordinator to ensure that students encounter patients across the lifespan and in a variety of clinical settings.

Clinical Passport

The passport is used to track procedures and encounters that students have completed while in the clinical setting. Students will have these procedures and encounters

Multiple choice examinations

These exams are designed to assess core medical knowledge and its application to the clinical setting. They also provide practice for the national certifying examination. Questions are based on any information that may be encountered in the specific medical setting of the student clinical rotation.

Medical documentation skills

These include, but are not limited to, patient encounter notes, procedural notes, admissions orders, progress notes, discharge orders, referral or consultation requests, and prescription writing.

Remediation

Students will be given the opportunity to remediate certain assessments in the program. Specific criteria are included in each course syllabus.

Contract to enhance PANCE performance

The contract is a method of scheduled study created by the program to help students strengthen their ability to take multiple choice exams and to prepare them for successful performance on PANCE. All students sign the contract at the end of their didactic year, agreeing to meet the designated criteria and complete the required assignments as outlined. All students may choose to participate in the contract assignments to help them improve their medical knowledge. Those that fall into the high-risk category are required to turn in weekly assignments which may include writing 5 MCQ questions relating to areas of weakness and/or their rotations, taking practice exams, and/or writing remediations, and meeting with the medical director. Students must write an explanation of why answers are right and wrong. Along with MCQ questions, students may also be required to write up a common disease related to their MCQ questions. Contract assignments may alter depending on the student's needs and/or areas of weakness. The contract is divided into three time periods: Summer 1/Fall, Spring, and Summer 2 following the didactic year. Students are categorized into high and low risk based on scores (see below):

- Summer 1/Fall period: Essentials MCQ #1-6 average >65 = low risk; <65 = high risk OR PACKRAT I >125 = low risk; <125 = high risk
- Spring period: Mid-summative exam >140 low risk; <140 = high risk
- Summer 2 period: End of Curriculum exam >1475 = low risk; <1475 = high risk OR PACKRAT II >145 = low risk; <145 = high risk

Students who are considered low risk, do not need to do any specific additional work related to the contract. They should meet with their academic advisor individually to set up study plans for their specific needs. Students who are considered high risk need to complete the contract weekly assignments. Students who do not submit weekly assignments will be given a professional advisement and be subjected to the Professionalism policy as outlined in this manual.

BOOK LIST

The required textbooks for each class are different. Please refer to the applicable list in the following pages.

The Chatham University Book Store carries all the required texts for purchase at the following link: [Chatham Bookstore](#). Please note, there is a discounted book bundle for the Elsevier books that you need to purchase available through the bookstore; if you have trouble locating this bundle please reach out to the program. In addition, seven percent state sales tax and shipping and handling are not charged. All purchases made through the Chatham University Book Store may be put on your student account. The Chatham University Book Store will order any book for you at any time.

Individual copies of all textbooks are available for purchase. These are not discounted, but there is no tax and they may be charged to your student account.

Purchasing books can be done online and will be available for pick-up during the first week of class.

Students may purchase their books anywhere. Please be careful if you buy books from other sources. Check to see that you have the correct edition and access to any available on-line resources. The book list changes yearly and is based on the evaluations by students, faculty and curriculum of the PA Program.

BOOKS AND PRICES MAY BE SUBJECT TO CHANGE WITHOUT NOTICE.

REQUIRED BOOK LIST Class of 2023

Author	Title	Edition
Asprey	Essential Clinical Procedures	4 th ed
Agur	Essentials of Clinical Anatomy	6 th ed
Ball	Seidel's Guide to Physical Examination (w/bind in Access)	9 th ed
Constanzo	Physiology	6 th ed
Dubin	Rapid Interpretation of EKG's	8 th ed
Goldberg	Clinical Neuroanatomy Made Ridiculously Simple (w/CD)	5 th ed
Gordis	Epidemiology (w/bind in access code)	6 th ed
Goroll	Primary Care Medicine (w/bind in access)	8 th ed
Gylys	Medical Terminology Express (w/bind in access)	3 rd ed
Netter	Atlas of Human Anatomy (Text only)	7 th ed
Sullivan	Guide to Clinical Documentation	3 rd ed
Tkas	Advanced Physiology and Pathophysiology	
Toledo	Anatomy Physiology Revealed (APR3.2) HTML (Access)	4 th ed
Varied-McGraw-Hill Publishers	<i>Access Medicine</i> Online Digital Resource Library Includes PA Easy Subscription **Included in student fees	N/A
	*Shadow Health Advanced Health Assessment (DCE Access codes) online resource subscription	7 th ed

*Please note that Shadow Health is access to an interactive website that is required. Access can also be purchased directly from the site (Advanced Health Assessment) www.shadowhealth.com

****Kindle Versions of texts are not permitted.**

REQUIRED BOOK LIST Class of 2024

The following books are required and will need to be purchased in advance of starting the program; students may purchase e-book OR hard copies of the textbooks dependent on preference. **Kindle versions of textbooks are NOT acceptable.**

Author	Title	Edition	ISBN	E-book ISBN
Asprey	Essential Clinical Procedures	4 th ed	9780323624671	9780323624688
Agur	Essential Clinical Anatomy	6 th ed	9781496369659	9781496369680
Ball	Seidel's Guide to Physical Examination (bind in Access)	10 th ed	9780323761833	9780323761864
Goldberg	Clinical Neuroanatomy Made Ridiculously Simple (w/CD)	5 th ed	9781935660194	
Netter	Atlas of Human Anatomy (Text only)	8 th ed	9780323793735	9780323793773

* see above regarding discounted bundle of these 3 resources through the Chatham bookstore (Elsevier bundle)

Below are online resources that you will be using and will need to access for several courses (instructions on obtaining access will be provided upon matriculation, you should not purchase anything prior to starting the program).

Shadow Health- Primary Care Modules*

In addition, the program has multiple required resources that you will utilize throughout the program that are provided through the Library and/or are included in student fees. Students will be given instructions on how to access these when courses begin. Required texts/resources provided by the University and the PA program are as follows:

Author	Title	Edition
Goroll	Primary Care Medicine (w/bind in access)	8 th ed
Knetchel	EKGs for the Nurse Practitioner and Physician Assistant	2 nd ed
Sullivan	Guide to Medical Documentation	3 rd ed
Tkas	Advanced Physiology and Pathophysiology	
Varied- McGraw-Hill Publishers	<i>Access Medicine</i> (Online Digital Resource Library)	

POLICIES AND PROCEDURES

Chatham University does not discriminate on the basis of race, color, religion, gender, sexual orientation, national origin, age, disability, veteran status, marital status or any legally protected status in its educational programs and policies, co-curricular activities, scholarship and loan programs, or employment practices. Inquiries may be directed to the director of human resources, Chatham University, Woodland Road, Pittsburgh, PA 15232, 412-365-1847.

STATEMENT OF INCLUSION

The PA program values diversity and multicultural perspectives. It is the program's intent to ensure that students from diverse backgrounds and perspectives feel safe and included in this course. The program hopes that each student will feel empowered and respected in their classes regardless of their gender, affectional orientation, able-bodiedness, age, socio-economic status, ethnicity, race, country of origin, skin color, culture, faith tradition, immigration status, and other background characteristics. The program strives to ensure that a diversity of multicultural perspectives be incorporated in this class. The program will appreciate any suggestions to enhance the value and considerations of diversity. If you choose, please inform the program director of pertinent aspects of your identity (e.g., military status, name, pronoun).

Chatham University and the PA program is committed to promoting a supportive and inclusive learning, living, and working environment for all members of the campus community. The University's best practice guidelines consist of the use of affirmed names and pronouns, and the use of inclusive language. Using inclusive language means talking in a way that does not assume gender, sex, or sexual identity. By extension, we encourage our students to role-model this behavior in the community at large to include interaction with all clinical partners, patients/clients and their families.

These policies and procedures supersede any previous policies and procedures of the Physician Assistant Program, and are superseded by any Health Sciences or Chatham University policies if there is a conflicting policy. Information contained herein is subject to change. The Chatham University Physician Assistant Program reserves the right to make exceptions to policies (admissions, academic, etc.) based on special circumstances. These decisions will be made on a case by case basis.

Information regarding the University's discrimination policy can be found here: <https://chatham.edu/legal-and-policies/non-discrimination-policy.html>

Disability Statement: Chatham University is committed to providing an environment that ensures that no individual is discriminated against on the basis of their disability. Students with disabilities, as defined under the Americans with Disabilities Act of 1990 (ADA) and who need special academic accommodations, should notify the assistant dean of the Office of Academic and Accessibility Resources (OAAR) as soon as possible. The OAAR will work with students and the course instructor to coordinate and monitor the provision of reasonable academic accommodations.

General Policies

PA students are not required to work for the program in any capacity. They are not to substitute for or function in any way as administrative staff. The program does not use students to substitute for or to function as instructional faculty in the program. During the clinical year of the program, selected second year students may work as tutors providing peer-to-peer support which is driven by requests from the first-year (didactic) students. Material covered in these sessions has already been covered in didactic courses and the sessions are used for review. This is a paid position through the Chatham University OAAR center and not through the PA program. Selected students are in no way required to accept a position. These tutoring positions are considered supplemental to the clinical year student in studying for clinical rotations, end of rotation exams, and ultimately the PANCE. As with first-year students, second-year students are discouraged from working in any capacity which does not support their studies. <https://chatham.edu/academics/support-and-services/office-of-academic-accessibility-resources/index.html>

No member of the faculty (principal faculty, program director, or medical director) is permitted to provide healthcare services to enrolled students in the program, except in an emergency situation. Incidental findings may be found during competencies, skills class, or other times during the program. The student is responsible for following up with their primary care provider.

Upon entrance to the PA Department students agree to the electronic release of grades and academic information within departmental faculty, staff, and from clinical preceptors for academic standing and advising reviews.

Name and Gender Pronouns: Class rosters are provided to the instructor with students' legal names. Instructor(s) will gladly honor requests to address student by chosen name and/or gender pronouns. Please advise instructor(s) early in the semester so that records can be modified.

COVID-Related Policies/Procedures: For all COVID-related policies, please refer to the University guidelines found here: <https://chatham.edu/covid-19/index.html>.

School of Health Sciences Policy for Lab Based Courses: One of the unique aspects in many of the School of Health Science Programs is the hands-on skills labs that are required for student education. These labs intermittently put students and faculty into close contact with each other in order to competently and effectively develop these professional skills. Student and faculty safety are our utmost priority, especially during times of pandemics and/or high rates of communicable diseases and therefore universal precautions, including droplet/airborne precautions are required during these lab activities when known risk is elevated. Depending on the specific lab activity, appropriate personal protective equipment will be required and will be provided to both the students and faculty by the University.

Exam Policies

Any violation of the University Honor code could be considered an academic misconduct and may have further program professionalism violations.

During every program examination on campus, the only items allowed in the testing room will be:

- Laptop and associated power cord as needed for the examination
- Writing utensil if needed for the exam
- Drink
- If a specific instructor requires other items in the room for the exam, students will be notified

No backpacks, bags, lunch bags, hats, hoodies, or purses are permitted in the room. If there is an urgent or emergent issue for which a student needs a cell phone, that student must leave the phone with the exam proctor (on silent) who will notify the student if an urgent message is received. Proctors will have their personal cell phones available in case of an emergency in the exam room. All valuables should be placed in an assigned locker (for first year students) or will be locked in the physical diagnosis lab (for second year students). Students are not permitted to access their bags, phones, etc. until after they have completed the exam.

If a student takes exams at OAAR, the student will follow the OAAR procedure for examinations.

<https://chatham.edu/academics/support-and-services/office-of-academic-accessibility-resources/index.html>

Software such as Proctorio may be used for exams which could include the enabling and use of the computer's camera and microphone for recording purposes. Turnitin may be used for assignments.

Counseling Policy

Chatham University provides confidential counseling services at no charge to all full-time students. Individual counseling sessions provide students an opportunity to explore personal, social, family or academic concerns. Faculty advisors in the MPAS do not offer counseling services, but will promptly refer a student to seek campus counseling for a variety of reasons, such as difficulties with personal relationships, emotional or social difficulties, stress, anxiety or concerns about academic progress. Students have the ability to self-refer as well. The counseling center is staffed by a full-time Doctor in Counseling Psychology and a part-time Doctor in Clinical Psychology. You may find further information in the Chatham University Catalog, by contacting the Counseling Services office at 412-365-1282 or on my.chatham.edu by clicking the Departments tab and then Counseling Services on the left side.

<https://chatham.edu/student-experience/health-wellness/index.html>

Title IX Policy Prohibiting Sexual Harassment

https://my.chatham.edu/documents/documentcenter/Title%20IX_FINAL_081320.pdf

Hazardous Exposure Policy

This policy includes exposure to any body fluids by needle stick, cut, splash, etc., or exposure to active tuberculosis, meningitis, or other potentially life-threatening diseases.

Biohazardous Waste

Within the Clinical Skills for the PA courses and the Clinical Procedures course, students/faculty may come in contact with human biohazardous waste from bodily fluids. Students are to place all items that have been contaminated into the appropriate waste bag or sharps container (containers/bags are red in color and marked). Gloves and other items that do not have biohazardous waste should not be disposed of in these containers, but in the regular trash. Once biohazardous waste has been collected, the faculty/staff is to box the waste in provided boxes from MedAssure and then should contact MedAssure for timely pickup.

Student Responsibilities:

1. Report to Employee Health at the rotation site within 2 hours of the exposure for initial testing. If not in a hospital setting, then go to the local emergency department.
The student will follow the policies and procedures of the site in which the exposure occurred (as directed by Employee Health or the Emergency Department).
2. If this occurs while on Chatham property during didactic education, notify the course director immediately and proceed to the nearest Emergency Department.
3. Report the exposure to a Chatham Clinical Coordinator (or if within the content of a didactic course, to the Course Director) immediately at: either (412) 365-2902; (412) 365-2765; (412) 365-1829; or leave message with the PA Program Office at (412) 365-1412 if the Clinical Coordinators are unavailable.
4. Maintain follow-up testing as recommended by the initial testing site.
*Students are responsible for all costs associated with testing related to an exposure (regardless of fault).

Financial responsibility related to significant exposure rests on the student.

Side effects of any recommended prophylaxis or treatment of the actual disease itself may cause significant health impairments that could result in a student having to take a leave of absence or withdrawal from the program.

Decisions of student progress based on exposures to hazards are handled by the SPAC on a case-by-case basis.

A student participating in a clinical experience domestically in an area identified as high risk for vector-borne and other potential hazardous exposures will follow current CDC recommendations for that particular region.

Immunization and Health Policy

Students will provide documentation for the following:

- Annual physical exam
- Annual influenza vaccine or completed Declination Section of the Influenza Vaccine Reporting Form with documentation from a healthcare provider
- COVID immunization record (two-shot series for either Pfizer® or Moderna®, or one-shot Johnson & Johnson®) and record of booster vaccination if five months since the original Covid-19 vaccination, or a signed Declination Waiver
- Tetanus-Diphtheria-Pertussis (Tdap) booster (Boostrix® or Adacel®) within 8 years
- Polio immunization record (If students cannot provide documentation of receiving at least 3 doses of the polio vaccine, a polio titer result must be submitted)
- Meningitis (Menactra® or Menveo®) immunization record from about 16 years of age, or a signed Declination Waiver
- Measles, Mumps, Rubella, and Varicella immunization records and antibody titer results
- Hepatitis B (3-shot series) immunization record and Quantitative anti-HBs titer result
- Hepatitis C (negative or positive) titer result
- Prior to admission: Negative 1-step PPD test or serology IGRA Blood test (interferon-gamma release assay), which is QuantiFERON Gold or T-SPOT within one year of the date of admission
 - If a student tests positive for TB with the skin-test or serology, then follow-up with their medical provider is required to determine appropriate next steps and upload a TB Clearance Reporting Form completed and signed by the medical provider.
 - Individuals who have had the BCG (Bacillus Calmette–Guérin) Vaccine need to have the serology IGRA Blood test. No chest x-ray or skin test is required by the program.
 - You may have this done by the Allegheny County Health Department, your own state's health department or your health care provider. The date must be within one year from admission to campus.
- Prior to Clinicals: Negative 2-step PPD test (will be scheduled on campus prior to start of clinical year) or serology IGRA blood test is required prior to beginning clinical rotations.

- If the two-step TB test expires prior to the beginning of any rotation of the clinical year, students must renew their TB testing by following the guidelines for the TB: Pre-admission 1-step Skin Test.
- Should a student elect to participate in an international clinical experience s/he will submit to the CDC recommendations for that particular country (vaccinations and/or prophylaxis for certain diseases).

Clearance, Background Check, and Training Policies

The following clearance and background checks are required:

- Act 31 (Training for Recognizing and Reporting Child Abuse)
- Act 33 (PA Child Abuse History Clearance)
- Act 34 (PA Criminal Record Check)
- Act 73 (Fingerprint-Based Federal Criminal History Background Check)

In addition to the above items, a Basic Record Scan will be run for the following:

<p>Basic Record Scan indicates reportable offenses in the following searches only:</p> <ul style="list-style-type: none"> County Criminal Drug Tests Statewide Criminal Statewide Sex Offender Index Statewide Parole & Probation Statewide Federal Criminal Nationwide Database Nationwide Sex Offender Index Nationwide Healthcare Fraud & Abuse Scan Nationwide Patriot Act Nationwide Federal Criminal Nationwide OIG Canadian Province-wide Criminal Canadian Nationwide Criminal International Criminal Nationwide FBI Fingerprinting
--

BEREAVEMENT POLICY

Three days of leave are granted to students when a death occurs in the immediate family (spouse, father, mother, brother, sister, son, daughter, or parent-in-law) of a student. One day of leave is granted to students for the death of a grandparent. If additional bereavement time is needed, students should discuss time needed with their advisor and may need to take a leave of absence.

Safety Policy

Chatham University has established safety policies and procedures as required by law and institutional accreditations. Such policies include: Campus Housing Safety (where applicable), Drug and Alcohol Regulations, Crime Prevention Programs, Sexual Assault and Sexual Offenders Regulations (including Sexual Harassment, Assault, Rape Prevention (SHARPS) Programs), Confidential Reporting, Missing Person and Emergency Notification System. The Safety and Security Policy and Procedure Manual are available to all Chatham faculty, staff and students in the University's intranet. Additionally, students are to be aware of local weather warnings and conditions on or off campus and should act accordingly to preserve their personal safety. This would include seeking safe and protective housing or retreat in the event of a major disaster. Every effort should be made to notify the local authorities and the program of an emergency.

Drug Screening Policy

ALL Chatham University PA students will be subjected to urine drug screening (UDS) prior to the start of and during a clinical experience as required by individual sites to maintain a safe and healthy workplace.

ALL students are required to have a UDS completed at a licensed clinical laboratory approved to offer UDS testing. Failure to comply with UDS testing during the required time frame *will prevent the student's participation*

in the clinical experience (CE) as scheduled. Thus, it may delay the completion of the Program. Students may be required to register for the CE at a later date, resulting in additional tuition/associated fees and housing costs.

If the student is taking prescription medication that can alter UDS results, the student should provide supporting documentation from the prescribing physician at time of testing.

The results of testing will be forwarded to the Program. All results will be kept confidential.

- **NEGATIVE** tests will be forwarded to each CE site in order for the student to be cleared for that CE.
- **POSITIVE** tests without supporting documentation will be forwarded the Program Director. Positive tests *may result in postponement or cancellation of the CE and possible dismissal from the program.*

POSITIVE UDS POLICY

I. False Positives

- A student may choose to appeal, if the student feels the result was a *false positive*.
- If a *false positive* is believed to have occurred, the student will need to obtain a verification blood drug screening (at the student's expense) within 24 hours of being given notice of the *false positive*.

II. True Positives

- A positive result without supporting documentation will result in the postponement of clinical experiences and academic activities, until the following criteria are successfully fulfilled.
 - o Students will be required to sign an agreement to continue in the Program, outlining the following conditions, understanding that failure to sign this agreement will result in **automatic dismissal** from the program.
 - Student will be referred for mandatory evaluation and counseling at a drug rehabilitation (rehab) program.
 - The rehab program will provide periodic, confidential progress reports to the Program Director.
 - Once student has successfully completed rehab, the student must pass UDS testing prior to re-entry.
 - Student **will** be subjected to random, periodic drug screening (at the student's expense) as a requirement for continuation in the Program. Student will be **dismissed** if any random UDS is positive.
 - Student also recognizes that their rotation schedule may be altered because of the above.

CLINICAL SITES

- I. An initial positive UDS may prohibit participation at some CE sites.
- II. Some CE rotation sites do require an additional UDS screening just prior to placement at the site. If a positive result is noted during this testing (even if the initial test was negative), the site could deny the student from rotating at the site. If this is the case, see the above section "Positive UDS Policy, True Positive" for the course of action.
- III. If warranted, sites may ask a student at any time during the rotation to submit to a UDS. If dismissed from the rotation because of a positive result, it will result in **automatic failure** of that CE. This may result in **dismissal** from the Program.

Failure to comply with this policy and/or evidence of continued drug use will result in an automatic dismissal from the Program.

Clinical Rotation Policies:

1. There are 9 rotations per student, 7 are required by accreditation standards (women's health, surgery, pediatrics, behavioral and mental health, family medicine, internal medicine, emergency medicine)
 2. Students are not permitted to copy patient records even if they are de-identified under ANY circumstance. This includes using cell phones to take pictures of records, photocopying, scanning, etc.
 3. Discussing patients on a public forum is forbidden.
 4. Taking pictures of anyone or anything while at clinical sites under any circumstances is strictly prohibited.
 5. Students cannot do rotations at the same site twice unless approved by the clinical staff.
 6. Students are expected to be at their site as preceptor/site schedules them, but no less than 32 hours per week for a 5-week rotation or 40 hours per week for a 4-week rotation.
 7. Students may not be precepted by personal friends, family, or close acquaintances.
 8. Students **MAY NOT** solicit sites or preceptors during their clinical year.
 9. Students may not fraternize with preceptors, site staff, or site administrators.
 10. Accessing personal health or anyone's records other than a person the student is responsible for treating using any health system's EMR software is **STRICTLY PROHIBITED**.
 11. All significant exposures must be reported to the site and the clinical advisor within two hours of the exposure. Follow the policy posted in Moodle (also contained in the rotation schedule folder).
 12. Students do not substitute for clinical or administrative staff while on site at clinical rotations. New sites are informed of this via the initial contact and continuing sites are reminded of this in the letters they receive prior to the start of each rotation.
 13. All clinical sites and preceptors are coordinated and approved by the program through the clinical coordinators.
 14. Students may propose clinical sites to the clinical coordinators but are not required to do so. Specific guidelines regarding proposals are addressed during the first fall semester.
 15. No student shall engage in the use of tobacco while at clinical sites. This includes chewable tobacco products, snuff and smoking by inhaling, exhaling, burning or carrying any lighted cigarette, cigar, pipe or other such device which contains tobacco or other smoke or vapor producing products such as e-cigarettes.
 16. No chewing gum is permitted in the clinical setting
 17. The use of cell phones, iPads, notebooks, etc. should only be used as needed for work and personal emergency situations during clinical activities. Cell phones should never be used in a patient room, areas visible by patients, in a procedure room, or in the operating room.
 18. Students should not falsify patient data or information they document on EXXAT
 19. All clinical sites have been designated as either Level 1 or Level 2 status by the Clinical Coordinators.
- Level 1 status is determined based on various reasons, including:
 - the rotation is more challenging/demanding/fast-paced
 - the preceptor may have exceptionally high expectations of students
 - the site requires team player
 - the site requires strong clinical reasoning skills
 - The Level 1 status was developed to better match students with clinical sites to provide the best experience mutually for the student and the preceptor.
 - Student must be in **Good Academic Standing** (not on probation) to be eligible for Level 1 sites.
 - Students are eligible for Level 1 sites based on feedback from PBL Facilitators for all Units 1-4. Facilitator feedback is collected during each of these units based on a rubric including categories in: **Clinical Reasoning, Knowledge Integration, Self-Directed Learning, Participations, Team Skills, Evaluation Process, and Communication Skills**. Students must receive an average of **3.2 or greater** for all categories to qualify for Level 1 sites.
 - Almost all Florida sites are designated as Level 1.
 - All students are eligible for Level 2 sites.
 - **Probation Status Restrictions:**
 - Not eligible for Level 1 sites.
 - May not have more than 2 rotations greater than 300 miles from campus.

- Not eligible for rotations at sites/hospitals that require students to be in Good Standing (Letter of Good Standing).

Tuition and Fees

For the **2022-2023** tuition and fees for the PA program see here: <https://chatham.edu/academics/graduate/physician-assistant-studies/program-tuition.html>

Students accepted into and enrolled in Chatham's PA Program who are citizens or permanent residents of the United States are eligible to apply for financial aid through the Federal Stafford Loan program. For more information, contact the financial aid officer at the Student Services Center.

Students may be eligible for a refund if they fully withdraw from the University during a specific time frame. Leaving the university may have current or future academic and financial implications. If this action will affect current registration, the student will be charged a percentage of the tuition for the course(s) they withdraw from after the add/drop period. The student is financially liable for any course in which a "W" is recorded and that withdrawing from a course or course could affect their financial aid. More information can be found about the Chatham University Institutional Refund Policy in the Course Catalog and students can contact the financial aid office for specific details and questions.

Laptop Requirements

Recommended hardware:

Intel i5 or i7 processor or AMD Ryzen 5 or Ryzen 7 processor

16GB memory

512GB SSD hard drive or larger

Wireless 802.11 a/g/n/ac (we do not support 802.11b)

Camera/Mic

Windows 10

Mac Book Air, Mac Book Pro

16GB memory

512GB SSD hard drive or larger

Wireless 802.11 a/g/n/ac (we do not support 802.11b)

Camera/Mic

Mac OS Sierra, High Sierra, Mojave, or Catalina

***Privacy Screen, internal or external camera, and a microphone feature is required for your laptop.**

Recommended items:

3-year manufacturer's warranty

3-year Accidental Damage Protection Policy

Theft Insurance

Academic Policies

Academic Advising

The students will be assigned an academic advisor for their course of study. The student should meet with the advisor as scheduled and at least once per term or more frequently if needed. The advisor provides academic and professional guidance and will refer the student for additional guidance, when necessary. If a student desires a change of advisor, the student may petition for a change of advisor to the Program Director. Academic advisors may change periodically, based upon faculty availability and/or students' academic needs. Students are also assigned a clinical advisor to assist with their clinical rotation sites, this may/may not be the same person as their academic advisor.

Grading

Course grades assigned will be pass (P) or fail (F). Individual assignments and evaluations will be graded as a numerical score, satisfactory (S) or needs improvement (N). All assignments and evaluations must be satisfactorily completed or satisfactorily remediated in order to receive a (P) in any given course. Specific assignments and their grading are defined in the individual course syllabi.

Timeliness

Each individual course director/instructor will indicate on syllabi consequences of late or missed assignments. A pattern of tardiness or absenteeism will be considered a professionalism occurrence and will be subject to the Professionalism policy. Due to the competency-based nature of the curriculum, students must complete all assignments, even if they receive an "N" secondary to timeliness.

Attendance

These are minimal expectations. Each instructor of record may impose criteria published in the syllabus that override the ones delineated below:

- Attendance is expected at all program-sponsored activities. In the event of an unavoidable absence, the student must notify the instructor and/or the program office prior to the scheduled activity start time. If an absence is longer than two days, the student must provide a written medical excuse specifying any physical or other limitations required, along with expected duration of such limitations.
- Students are responsible for any missed coursework, regardless of the reasons they miss a program-sponsored activity. A pattern of absences or tardiness reflects unacceptable professional comportment and could jeopardize the student's progress in the program. Students are strongly advised to arrange personal activities, such as routine medical/dental visits or interviews, during their scheduled recesses. All absences (excused or unexcused) require remediation to be arranged with the student's instructor of record and must be completed by the designated due date.
- Foreseen absences may be excused if requested in writing (by Chatham University email) to the instructor of record for the course (first-year students) or the Clinical Coordinator (second-year students). The student's advisor should be sent a copy of the request. Official program notification of approval or denial of the request will be sent (by email or printed form).
- Requests for observance of religious holidays require notification to the course director of any classes missed. Arrangements for missed class/exams will be made on an individual basis with the student and the course director.
- In the event of a clinical preceptor's absence, students are required to immediately notify the clinical coordinator. Arrangements may be made by the clinical coordinator to reschedule or reassign the student.

Reasons for expected attendance at sponsored activities include:

- Problem-Based Learning Sessions - As a member of a team whose goal is to learn the art and science of medicine, every participant of a PBL group must contribute their knowledge and reasoning skills in order that effective learning transpires. If any participant is absent, the entire group suffers from the absence of that participant's contributions.
- Labs - Laboratory sessions are designed to assist students in developing and completing the necessary skills competencies. In order to guide, maintain, and assess student progress, attendance is mandatory.
- Special Seminars and Special Events - Special seminars and events such as field trips and conferences are planned with the expectation of providing the students with additional learning opportunities. Lectures and seminars provided by adjunct faculty and instructors cannot be duplicated and missing these activities could be detrimental to the overall educational experience of the student, attendance is mandatory.
- Meetings - Class meetings are held to provide students an opportunity to address problems, exchange information, and plan events. If a student does not attend these meetings, the student will lose their voice in the direction of the program and may miss vital information. All students are responsible for all material announced at these meetings, attendance at these meetings is mandatory.

Grade Appeals

Students may encounter a variety of various challenges over the course of their 24 months in this program, including failing courses. The grade appeal process can be found here: <https://www.chatham.edu/catalog/2021-2022/page.cfm?name=academic-grade-appeals&p=487>.

Dismissal Appeals

Students may appeal a program dismissal. The process for dismissal appeals can be found here: <https://www.chatham.edu/catalog/2021-2022/page.cfm?name=dismissal-appeals&p=494>

Office of Academic and Accessibility Resources

<https://chatham.edu/academics/support-and-services/office-of-academic-accessibility-resources/index.html>

Honor Code and Academic Integrity Policy

The student shall be responsible for maintaining the academic standards of the University as required by the University honor code. It is the policy of the Physician Assistant program to recommend probation and/or dismissal for any academic misconduct as defined in the Chatham University Course Catalog. Please refer to the Course Catalog under “**Honor Code**” for full details regarding the Student Behavior and Conduct Policy and the Academic Integrity Policy.

Professionalism

Students enrolled in the Chatham University Physician Assistant Program will demonstrate responsibility and accountability for personal and professional behaviors at all times when representing Chatham University as outlined below:

Professional Behavior

Includes, but is not limited to:

- Showing Integrity, respect, openness to new situations and people, and eliciting and demonstrating receptivity to constructive feedback
- Recognizing one’s limitations and informing preceptors when assigned tasks are not appropriate to current knowledge and/or skills
- Performing all clinical experience activities with the awareness of and under the supervision of the site preceptor
- Taking responsibility for one’s own actions and showing respect for patients by maintaining appropriate confidentiality of the patient’s record and demonstrating awareness and respecting patients’ cultural beliefs and behaviors
- Following site policies and procedures
- Utilizing effective communication skills to form and maintain positive relationships with patients, peers, staff, and preceptors
- Displaying a high level of motivation and interest while maintaining a calm and reasoned manner in stressful and/or emergency situations
- Understanding legal and regulatory requirements, as well as the appropriate role of the physician assistant
- Building professional relationships with physician supervisors and other health care providers
- Demonstrating respect, compassion, and integrity
- Responding to the needs of patients and society
- Being accountable to patients, society, and the profession
- Committing to excellence and on-going professional development
- Committing to ethical principles pertaining to provision or withholding of clinical care,

- confidentiality of patient information, informed consent, and business practices.
- Respecting and being responsive to patients' culture, age, gender, and disabilities
- Performing self-reflection, critical curiosity, and initiative
- Exhibiting emotional intelligence and maturity

Unprofessional Behavior

Includes, but is not limited to:

- Tardiness (of more than 5 minutes) or unexcused absences (must let program assistant or instructor know ahead of scheduled class time otherwise it's unexcused via phone or email)
- Refusal to see a patient when requested to do so
- Impersonating a certified PA or any other health professional
- Breaching patient confidentiality
- Conducting oneself in an inappropriate conduct of a sexual nature
- Performing under the influence of drugs or alcohol during patient or professional encounters
- Demonstrating inappropriate body language or non-verbal communications such as eye rolling, mumbling under one's breath, or taking an argumentative tone when dealing with patients, peers, staff, faculty, or preceptors, inappropriate emails (ex. Beginning an email with Hey....)
- Declining to follow documented program procedures including those found in course syllabi
- Speaking negatively about or using inappropriate language with faculty member, fellow classmates, clinical preceptors or clinical site's office staff
- Fraternizing with a faculty member, including clinical preceptors, office staff, or site personnel
- Failing to avoid a conflict of interest, the appearance of a conflict of interest, or the need to examine the ethics of acceptance, students may not accept gifts of any kind from preceptors
- Posting of information on any public platform or social media site

Civility in the Classroom

Includes but is not limited to:

- Demonstrating respect for faculty members and students with all communication and exchanges, along with appropriate respectful behavior
Examples: Using polite tone and conversation, reviewing written responses before sending, and the using constructive criticism in feedback

(A rule of thumb is to think: would I say or do this in a face-to-face interaction and/or how might this information be perceived by another?)

Incivility in the Classroom

Includes but is not limited to:

- Challenging authority
- Inappropriate use of social media for sharing or promotion of academic work
- Demanding special treatment
- Demonstrating an "I paid for this" mentality
- Making offensive remarks
- Missing deadlines/late assignments (without discussing with the instructor and receiving approval ahead of the due date time)
- Answering few if any questions or failing to participate in classroom or online discussion
- Challenging the instructor's credibility
- Taunting or belittling others
- Challenging the instructor's knowledge
- Making verbal or physical threats to the instructor and/or other students
- Engaging in academic dishonesty (cheating and/or plagiarism)
- Making harassing, hostile, or vulgar comments

- Sending the instructor inappropriate e-mails (beginning emails with “Hey....”)
- Using electronic devices (phones, smart watches) during class time and/or inappropriate use of computer during class time
- Inappropriate use of laptop during exams (emailing during exam time, looking at other websites, etc.)

Dress Code

The following guidelines are meant to give a general overview of what the program and profession considers professional dress. Students are responsible for being knowledgeable of and adhering to the requirements and standards of the clinical site and Chatham University with regard to dress code. Some specific restrictions are present due to safety reasons in the health care setting, and these will be pointed out. The program recognizes that cultural, ethnic, religious, and other differences among our student body help us to better represent the population which we serve. The program will make reasonable accommodations for dress or grooming directly related to a student’s religion, ethnicity, or disability unless such accommodation poses a safety risk to the student or others. If you notice deficiencies in this policy, please bring it to the attention of the program such that the policy can be amended as necessary. We aim to ensure the safety of students while maintaining and supporting the backgrounds that make us unique healthcare providers.

- **Please note: If the clinical site has established policies and practices regarding dress, the site’s policies supersede those of the program.**

General guidelines: The healthcare professions deem modest attire as professional. As such, the program requires modest attire in both the classroom and while in clinical settings.

- Students may express personal taste through appropriate dress.
- Students are to be well groomed and practice good personal hygiene.
- Clothing should be clean, untoned, wrinkle-free, and free of offensive figures, pictures, or wording.

A. **Classroom Attire:**

- All bottoms (pants, jeans, shorts, skirts, etc.) and dresses must be mid-thigh length or longer
- Scrubs are only permitted for program activities when indicated by an instructor.
- Pajamas are not permitted.

B. **Lab Attire:**

- All students are expected to wear clothing for examination and procedure labs that allow for examination of the appropriate area. Students are expected to wear a shirt that can be removed for particular labs, sports bra (if appropriate), and loose-fitting shorts.
- During procedures’ labs, students must wear closed-toe shoes.
- If lab attire is different than listed above, instructor will notify students of specific requirements prior to the lab session.

C. **Professional Attire for Clinical Rotations and Competencies:**

- D. *****Any questions regarding professional attire for rotations or competencies should be directed to the Associate Director of Clinical Education for clarification.*****

General:

- Professional dress is expected unless otherwise indicated by the clinical site, such as when scrubs are required/recommended.
- Appropriate attire is to be modest and conservative, and may include:
 - Long-sleeved button-down shirts and ties
 - Professional tops and pants
 - Skirts, dresses, and tunics no more than 2 inches above the knee.
- Pants must be at a length in which they do not touch the floor.

- Students should take note of length of skirt and skirt slit when sitting, or placement of neckline on tops when they lean to examine a patient.
- Undergarments should be concealed by outer garments.
- A wristwatch with a second hand is required (smartwatches are acceptable).
- All lab coats must include the Chatham University rocker and patch permanently affixed to the upper left sleeve. Lab coats are to be worn unless the clinical site allows the student to go without.
- Jeans are not permitted on clinical rotations (***even if the clinical site has a “casual day”***)

Shoes/ hosiery

- Shoes should be appropriate for the work being performed and must be clean, closed-toe, and closed-heel in nature. Acceptable styles include oxfords, dress flats, loafers, or heeled dress shoes less than 2 inches in height. Tennis shoes/sneakers are not permitted for office-based settings unless a medical condition warrants this type of footwear.
- Hosiery should be solid opaque or sheer and should be neutral in tone. Hosiery must be worn with skirts or dresses. Hosiery may be worn in lieu of socks with pants.
- Socks may be worn only if they are covered by pants or slacks and should be similar in color to the shoes and/or pants. Socks should be of a length that bare skin is not visible when the student is sitting.

Hair

- Hair should be clean and secured off the collar and face. If needed, hair should be secured with small, simple accessories. Hair bands shall be of a neutral color.
- Religious head/hair pieces (head scarfs, hijabs, yarmulkes, wigs, etc.) are permitted so long as they do not pose a safety hazard or otherwise impede the student’s ability to provide patient care safely (for example: some items may not be permitted in the surgical setting).
- Hair should be of a natural tone.
- Beards and mustaches, if present, should be kept neat and trim for safety reasons.

Jewelry

- In order to ensure the safety of students in the clinical setting, minimal jewelry is encouraged. Jewelry should not be functionally restrictive or excessive. Students should avoid wearing long or dangling earrings for their own and for patient safety. There should be no visible jewelry in body piercings with the exception of earrings and/or a single nostril stud (no rings or septum piercings permitted for safety). No more than two pairs of simple earrings may be worn per ear. In the case of religious requirement, certain additional piercings may be acceptable. Please consult the Associate Director of Clinical Education if you have a religious requirement for piercings. No other facial jewelry (e.g., tongue, eyebrow piercings, etc.) is allowed and band-aids cannot be used to cover piercings of any location.

Tattoos

- Tattoos are to be covered by clothing, gloves, make-up (for head and neck), or other reasonable means.

Perfumes

- Students are not permitted to wear fragrant products in the patient care setting (i.e., cologne, perfume, lotion, etc.).

Nails

- Nails are to be unpolished, clean, and short (fingernail must not be visible from the ventral view).
- Artificial nails are prohibited. Artificial nails include, but are not limited to, acrylic nails, all overlay tips, bonding, extensions, tapes, inlays, wraps, dip and gel.

Identification:

Students must introduce themselves as a PA student from Chatham University at the beginning of all patient encounters and during competencies. Students shall be identified as follows:

- Nametags and Chatham University photo identification tags are to be worn at all off-campus special seminars, all clinical experiences, and all research activities. Nametags and photo identification tags shall be worn on the left pocket or lapel not below the waist. If the site requires another form of identification, the student must wear both identifications.
- The lab coat must be **short**, white (blazer-style) with the Chatham University patch on the left upper sleeve at the shoulder with the identifying rocker sewn directly beneath.

Timeliness

- Students will arrive at class/clinical sites at predetermined time
- Students will contact their faculty/preceptor or program secretary **prior to the beginning of the class/shift in the event of an unplanned absence** due to illness, emergency, or another unforeseen event
- Unexcused or repeated tardiness is evidence of unprofessional behavior and is unacceptable for the classroom/practice experience
- Student must notify the clinical experience faculty/staff of repeated or prolonged delays and absences of planned clinical experience hours

Technology Use

- Cell phones, smart watches, or other electronic mobile devices should only be used as needed for work and personal emergency situations during class or clinical experience activities
- Use of site-based computers is restricted to activities associated with patient care or activities related to the practice experience
- Under no circumstances should the student use the site-based computer to check personal e-mail, participate in social networking, or access the internet for personal use
- Personal video or audio taping of lectures/class time is prohibited using any type of recording device. Lectures recorded by professors will be made available at the discretion of the professor/lecturer (ex. Panopto).

Social Networking

- If the site has established policies and practices regarding social networking, the site's policies supersede those of the program
- Students should be cautious about what they post and what is posted about them
- Students should not identify their site by name or criticize the site or staff
- Students should not post information about what is happening at the site
- Students should not post any information about or pictures of patient(s) even if identifying information is eliminated
- Students are required to use only their Chatham e-mail address when corresponding with rotation sites and program faculty and staff

Scope of Practice

- Students will refrain from performing any technique or procedure which is outside of their scope of practice and/or they have not been appropriately educated on the proper procedure

Privacy and Confidentiality

- Students will maintain privacy and confidentiality of all patients according to HIPAA guidelines
- Students will maintain privacy and confidentiality of classmate or faculty information that may be revealed in the context of small group learning
- Students will demonstrate ethical behavior at all time

Policies and Procedures

- Students will adhere to the policies set forth in the Chatham University Student Handbook, University catalog, PA Student Manual, PA Clinical Manual, PA Code of Ethics, and HIPAA

guidelines

- Policies of the host site will be adhered to, in addition to or in accordance with those established by the Chatham University PA Program
- Site policies that are more restrictive than what is reflected here supersede these requirements
- Students must be aware of the rules, regulations, and policies; ignorance is not an excuse for misconduct

****These standards are applicable to all Chatham University PA students representing Chatham University at all times.***

Depending on the severity and number of occurrences, consequences may include anything from a formal written warning to dismissal from the program. Professional policy occurrences will be reviewed on a case-by-case basis and escalated to higher administration as warranted.

Professionalism policy:

When any academic or clinical faculty member or preceptor identifies and documents an instance of unprofessional behavior throughout the program, the following procedures will be followed:

1. **First occurrence:** the student will meet (either in person, a phone call or via email) with the instructor and/or advisor and be given a professionalism advisement.
2. **Second occurrence:** student will meet with instructor/course director and advisor and be given a professionalism advisement.
3. **Third occurrence:** student will be given a professionalism advisement **AND** be referred to SPAC. The student will meet with SPAC (including the Program Director) to discuss their behavior. The student may be issued a professional written warning from SPAC depending on the nature of the previous occurrences.
4. **Fourth occurrence:** student will be given a professionalism advisement, meet with SPAC **AND** SPAC will discuss current and previous occurrences and either issue a professional written warning from SPAC **OR** place student on academic probation for professionalism depending on the severity of the occurrence (s). In either case, the student will develop a professionalism behavioral remediation plan and work with their advisor on adhering to the plan.
5. **Fifth occurrence:** student will be given a professionalism advisement **AND** if student was given a professionalism written warning previously from SPAC, student will be placed on academic probation. If placed on academic probation from SPAC previously, student will be dismissed from the program.
 - a. **If Student has another occurrence after being placed on probation (their 6th occurrence), the student will be dismissed from the program.**

*A student is required to sign an advisement within 3 days of receiving the advisement.

If an individual faculty or staff member feels that the unprofessional conduct of the student is severe; harmful to a patient, fellow student, faculty or staff member; or risks Chatham's reputation, the student's occurrence(s) will be referred directly to SPAC even if this is a first occurrence and may result in academic probation or program dismissal. A student may also be referred to the Academic Integrity Council (AIC) for professionalism.

Letters written from SPAC will be sent within 1-2 days of the meeting and will require the student to sign the letter. The student will also develop a professionalism behavioral remediation plan within one week of the letter being issued to be turned into the program assistant. The student may work with their advisor or other faculty member to develop their personal plan.

Professional Comportment

Comportment encompasses all academic and professional experiences. Every individual has the right to learn and work in an environment free of threats, harassment, retaliation, or other risks. All occurrences of non-professional comportment must be addressed and is subject to the University Honor Code policy. Individuals should immediately remove themselves from the situation and report the occurrence to the Program Director.

Social Media Policy

Social media are internet-based tools designed to create a highly accessible information highway. They are powerful and far reaching means of communication that, as a physician assistant student at Chatham University, can have a significant impact on your professional reputation and status. Students are liable for anything they post to social media sites and the same laws, professional expectations, and guidelines are expected to be maintained as if you were interacting in person. The Chatham University PA Program supports your right to interact knowledgeably and socially. Guidelines have been developed to outline appropriate standards of conduct and are also found in the University Student Handbook under Guidelines for Social Media Usage.

Guidelines for social media use:

1. Social networking (or 'friending') Program faculty and staff, guest lecturers, clinical preceptors, rotation site staff or current/former patients is strongly discouraged.
2. Take responsibility and use good judgment. Incomplete, inaccurate, inappropriate, threatening, harassing or use of profanity on your postings is strictly prohibited.
3. Think before you post as your reputation will be permanently affected by the Internet and email archives.
4. HIPAA laws apply to all social networking so it is the utmost priority to protect patient privacy by not sharing information or photographs.
5. You must protect your own privacy as to not let anyone see your personal information or use your individual account(s).
6. Social networking is permanently timed and tracked. Therefore, in order to respect work commitments, social networking during class, program activities, and clinical time is strictly prohibited.
7. If you choose to use "Chatham PA Program" in your group posting name, you must post a disclaimer on the page stating that your views are that of your own and do not reflect the views of the Chatham PA program or Chatham University.
8. All laws governing copyright and fair use of copyrighted material must be followed.
9. Consult your faculty advisor or the Program Director if you have any questions regarding the appropriateness of social networking use.
10. Students should not put posts or photos on social networks about rotation experiences (including location, clients, diagnosis, treatment, preceptors and staff etc.) Names of supervisors, comments or criticism about sites or information about what is happening at sites are not appropriate and prohibited.
11. The Program at any time may request immediate access to class pages; failure to grant access may result in disciplinary actions.

Failure to follow the above stated guidelines may be considered a breach of appropriate professional behavior and be subject to discipline, up to and including dismissal from the program.

E-Mail Policy

Students are required to check their Chatham email on a daily basis and respond to faculty/staff emails within 24 hours during the week and 48 hours during the weekend. Failure to follow this policy may result in a professionalism violation.

Student Progress Advisory Committee (SPAC)

The Student Progress Advisory Committee (SPAC) will review all students at least once per semester and recommend progression, deceleration, probation and/or dismissal. A student may be referred to SPAC at other times for unprofessionalism behavior and/or academic failures. The referral process to SPAC is outlined in the Professionalism section. In circumstances where the University Honor Code policy has been violated, the student will be referred by the course director (or instructor/faculty member) to the University Academic Integrity Council (AIC) and to SPAC. The recommendation of the AIC will be discussed by SPAC and further consequences may be given to the student.

Composition and Process

The SPAC shall be composed of the Associate Program Director, Academic Coordinator, Associate Director of Clinical Education, and appointed members of the faculty (voting members) by the PD, and the Program Director (non-voting member). Other designated Physician Assistant faculty may be involved on a case-by-case basis. SPAC may make one of the following recommendations:

Progression

Any student who is passing all courses will be recommended for progression to the next semester. The student will receive no correspondence from SPAC.

Formal Letter of Warning

If referred to SPAC for unprofessionalism behavior, a student may receive a formal letter of warning informing them of the potential for academic probation or program dismissal if there are further incidences.

Deceleration

A student may be placed into an altered didactic sequence of the program (deceleration). Reasons for deceleration may include:

- Failure of any of the following:
 - One academic course that has a pre-requisite (except PAS 600/601 as failure of either results in dismissal)
 - Summative evaluation as defined in course syllabus for PAS 628
- Valid medical issue (verified by a treating medical provider's letter)
- Military service requirement (verified by original orders)
- Personal leave of absence

*Depending on the reason for deceleration, a student may graduate at a later date or join the next cohort.

Students who are decelerated because of academic failure of a course (other than PAS 600/601 which results in dismissal from program) will be automatically placed on academic probation for the remainder of their time in the program. Decelerated students will be considered members of the following class and will not be able to walk or graduate with their original class. Other than for military or medical reasons, no more than one opportunity for deceleration will be granted. All students enrolled in the PA Studies program must complete all degree requirements within three years after the date of their first enrollment in the program. When a student returns to the program, all of their previous professionalism advisements will remain on their record.

Students may not withdraw from one or multiple courses in order to concentrate on a particular course (or courses) and continue in the program due to the nature of the curriculum.

Academic probation/Dismissal

Because the Physician Assistant program assigns pass/fail grades rather than letter grades, the academic probation policy discussed here differs from that in the Chatham University Course Catalog.

A student may be placed on academic probation for course failure (other than PAS 600/601 which results in dismissal from program) or other unprofessional behavior after having received multiple warnings as described in the Professionalism section. While on academic probation a student will be dismissed from the program for subsequent failure of one course. A student may be dismissed for further unprofessional behavior if they are on academic probation.

In the clinical year, failure of one clinical rotation will require a student to repeat that course and may subsequently delay graduation. Failure of more than one course in the program will result in automatic dismissal from the program. Deceleration due to course failure will result in academic probation.

Students on academic probation may not be eligible for rotations at sites designated as competitive rotation sites and/or may not travel to more than two remote rotation sites. Students are not be eligible for employment

in the University tutoring program or serve as mentors. Academic probation may affect state licensing and/or recommendation and credentialing information provided to potential employers and credentialing institutions.

Students placed on academic probation due to course failure (other than PAS 600/601 which results in dismissal from program) will remain on probation throughout the length of the program. However, students on academic probation for reasons other than course failure have an opportunity to be removed from such status after two successful semesters (as defined below) in which there are no further academic or professional incidences. If it is determined that such a student has shown sufficient professional improvement, the SPAC committee may recommend that said student be cleared of the probationary status.

Leave of Absence

Please refer to the Chatham University Course Catalog for Leave of Absence policy. All requests for a Leave of Absence must be first submitted to the Program Director. The Program Director will advise student on subsequent steps in the process. Please note that a leave of absence will not be granted by the Program Director if a student is failing a course at the time of request. If a leave of absence is granted, students must report to the Program Director their intention to return to the program by April 1 of the spring semester preceding their scheduled return to the program or at a date defined by the Program Director. Students who take a leave of absence, their professionalism incidences from the semester prior to their leave will remain on their student record in the program.

Withdrawal from the program

A withdrawal may be requested by the student in writing with or without the recommendation of the SPAC. Any refund will be made in accordance with both the University's and federal government's refund policies. The appropriate paperwork for withdrawal from courses is provided by the University Registrar or on my.Chatham.com. Incurred expenses prior to withdrawal (including, but not limited to memberships, fees, equipment, and books) are not refundable. The student who withdraws while passing all coursework to-date may re-apply through the admissions process with the exceptions of extenuating circumstances, as determined by the SPAC.

These may include, but are not limited to:

- Family emergency
- Prolonged illness
- Military activation
- Pregnancy
- Others (as validated by the SPAC)

Students who withdraw while failing coursework are not eligible for re-admission to the program.

ADDITIONAL INFORMATION

Videotaping

Students may be videotaped performing tasks such as interviews, history and physical examinations, and/or patient education sessions. These tapes will be used to aid in evaluating communication and physical examination skills. Students will have the opportunity to review the tapes and self-evaluate.

Basic Life Support (BLS) Certification

Students must be certified in BLS for Healthcare Providers prior to starting their Clinical Rotations in the second year. Certification is arranged on campus before the start of clinical rotations (this is subject to change). If a student chooses to not participate because they are already BLS certified, the student must provide documentation of certification that will last through the entire clinical year. Many clinical sites require proof of current BLS and a student may not be allowed to attend these sites if these certifications are not current. This action may result in a delay in graduation. Students must provide documentation of certification to the Clinical Coordinators.

Latex Allergy

Latex allergy/sensitivity is a growing concern for health care professions. Chatham University Physician Assistant Studies Program is unable to provide a latex-free environment to learners in either the clinical practice laboratories on campus or clinical placement sites off campus. Applicants who have a known latex allergy/sensitivity are encouraged to consult their personal health care provider prior to entering a health care profession.

Moonlighting / Employment/Sports

Employment while a first-year student in the Program is strongly discouraged due to the intensity of the curriculum and time constraints of problem-based-learning. Work cannot supersede program activities or group meetings at a time convenient for the majority. Students may not be employed by the program in any capacity. No student will be required to perform any work for the program or for any member of the faculty. Being on a sports team is **STRONGLY** discouraged and students will not be dismissed from class for games/meets or practice. Practice or games cannot supersede program activities or group meetings at a time that is convenient for the majority.

Shadowing as a PA student

Shadowing as a student will not be facilitated by the Chatham University's PA program. For those who want to shadow a medical provider, they must make arrangements that are independent of the program and be aware that they are not representing Chatham's PA program. They must not wear their Chatham PA white coat with the program logo nor the name badge and are not covered by the program's liability insurance. The student is obligated to make this clear with the medical provider they are shadowing. Students making shadowing plans independently of the program are advised that their status is reversed back to that of a non-provider observer and not perform tasks or provide services that are routine for a PA student at a clinical rotation.

Student Emergency Aid and Essentials Need Services

The Office of Student Affairs works with campus and community organizations to provide a number of services to assist students who are in need. If a student needs assistance with an unexpected emergency or is having ongoing personal financial difficulties, the Office of Student Affairs (1st floor of Woodland Hall, Shadyside campus) may be able to assist. Contact info: 412-365-1286 or email osa@chatham.edu.

Review of student progress in the program

A student may progress to the next term if they have satisfactorily completed all assignments and evaluations for the previous term, and has received a "P" grade in all coursework.

Program awards

At the time of graduation, awards may be bestowed based on nominations from students, faculty, or preceptors. Awards recognize outstanding participation in problem-based learning, outstanding performance in clinical rotations; outstanding leadership; and outstanding service to the class, program, college, or community and achievement. Awards will be officially announced at the White Coat Ceremony.

Graduation

A student may graduate if they have satisfactorily completed all assignments, evaluations, and other requirements for the program, and has received a "Pass" grade in all coursework. Failure to do so will result in the delay of the student's degree conferral.

PA ORGANIZATIONS

American Academy of Physician Assistants (AAPA)

The AAPA is the national professional society for Physician Assistants. Founded in 1968, the Academy has chapters in all 50 states, the District of Columbia, and Guam. They also have chapters that represent physician assistants working for the Public Health Service, the Department of Veteran's Affairs, and all branches of the military.

The mission of the AAPA is to "promote quality, cost effective, and accessible health care and to promote the professional and personal development of PAs". Major activities to accomplish this goal include government relations, public education, research and data collection, and professional development.

Eighty percent of all practicing physician assistants are members of AAPA. Members are graduates of accredited physician assistant programs and/or those who are nationally certified. Students at accredited programs are also eligible for membership.

The AAPA's Physician Assistant Foundation (PAF) provides funds for scholarships and research on the PA profession. For more information, contact:

American Academy of Physician Assistants
2318 Mill Road Suite 130
Alexandria, VA 22314

(703) 836-2272
Fax (703) 684-1924
Web Site: www.aapa.org

National Commission on Certification of Physician Assistants (NCCPA)

NCCPA is an independent organization established to assure the competency of physician assistants. NCCPA was formed in 1975 by the AAPA and other health professional associations in order to administer a national certifying examination to graduates of accredited PA programs. The initial examination (PANCE) and the recertification examination (PANRE) are designed to test the medical knowledge and clinical skills of PAs. For more information, contact:

NCCPA
12000 Findley Road
Duluth, GA 30097

(678) 417-8100
Fax (678) 417-8135
Web Site: www.nccpa.net

Physician Assistant Education Association (PAEA)

PAEA is the only national organization in the United States representing physician assistant (PA) educational programs. Its mission is to pursue excellence, foster faculty development, advance the body of knowledge that defines quality education and patient-centered care, and promote diversity in all aspects of physician assistant education. For more information, contact:

PAEA
655 K Street NW
Suite 700
Washington, DC 20001-2385

(703) 548-5538
Fax: (703) 548-5539
Web Site: www.PAEAonline.org

Pennsylvania Society of Physician Assistants (PSPA)

The PSPA was established in 1976 to act as a representative of all physician assistants within the Commonwealth of Pennsylvania. For more information, contact:

Pennsylvania Society of Physician Assistants
PO Box 128
Greensburg, PA 15601

(724) 836-6411
Fax (724) 836-4449
Web Site: <http://www.pspa.net>

Accreditation Review Commission on Education for the Physician Assistant (ARC-PA)

ARC-PA is the accrediting agency that protects the interests of the public and PA profession by defining the standards for PA education and evaluating PA educational programs within the territorial United States to ensure their compliance with those standards. One of the requirements for becoming a Physician Assistant is to have graduated from an ARC-PA accredited Physician Assistant Program. For more information, contact:

ARC-PA
12000 Findley Road, Suite 150
Duluth, GA, 30097

(770)-476-1224
Fax (770)-476-1738
Web Site: www.arc-pa.org

COMMON DISEASE AND ILLNESS

The following link to the NCCPA PANCE blueprint is provided to you as an addendum to the Program Competencies. This is to be used as a guide to study during the didactic and clinical year as well as preparation for the PANCE. These exam specifications are based on the results of the most recent profession-wide practice analysis. The examples provided for each medical content and task category are indicative of the types of information that will be included on the exam. It is not possible to include all topics on a single exam, and it may be possible that some questions on the exam cover content that is not listed in the examples.

<https://www.nccpa.net/pance-content-blueprint>
