

# How to Install Sophos VPN Client – Mac OS

## Overview

---

This documentation will explain how to install Sophos VPN Client on a Mac OS

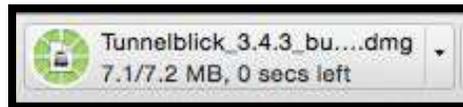

## Instructions

---

1. Open any web browser [Google Chrome is used in this example] and navigate to <https://tunnelblick.net> (be sure to include the <https://>)

2. Click the green Download arrow  to begin the download.

3. The application should automatically start downloading to your computer. Open the installer once the download completes.

4. Double click the TunnelBlick icon to begin the installation, and click Open to the next prompt.

5. You may be prompted to enter your laptop user credentials to continue the installation.
6. After it finishes installing, you will notice a shortcut icon for TunnelBlick near your clock, and it will be in your Applications folder as well.

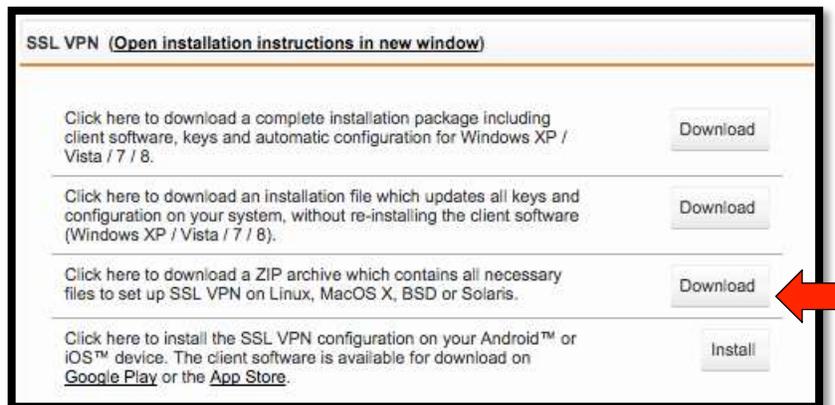

- Next, you will need to download your VPN profile ---- open any web browser and navigate to <https://utm.chatham.edu> (be sure to include the <https://>).
- Log into the site with your Chatham username and password and click **Login**.

- Click **Remote Access** in the menu at the top of the site.

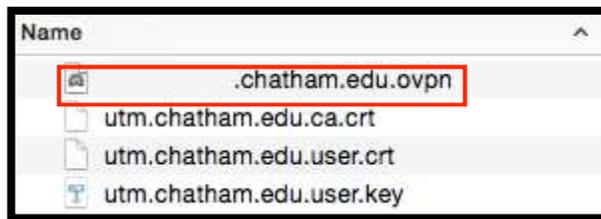

- Click the third **Download** button in the list of options to download the VPN configure files to your computer.

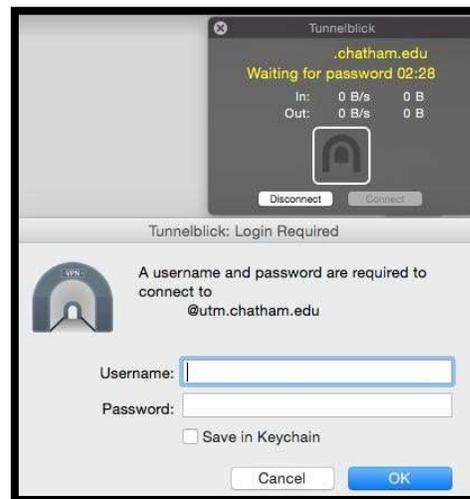

11. Click the .zip file once it downloads and it will automatically unzip in your Downloads folder. Look for the **config** folder.

12. Within that folder there will be another folder that is named yourusername@utm.chatham.edu; double-click the **.ovpn** file inside that folder to install the VPN configuration file to the TunnelBlick application. Note, you will be prompted to enter your laptop user credentials to install the file.

13. Click the Tunnelblick icon and select **Connect**. Then enter your Chatham credentials when prompted

14. To disconnect, click the TunnelBlick icon again and click **Disconnect**

## How to Connect to Drives

---

1. Click on Finder then Go > Connect to Server > smb://

Drive G: Folder FSVR07/academics ( 0 is a Zero)

Drive H: Folder FSVR07/Administrative
